"The Greenhouses Down From The Road"

FOREWORD

Our retail business has so increased since our first price-list was issued a year ago, that a much larger issue has been made necessary.

The caption "Perennials and Gladioli" that appeared on the outside cover of our first issue is now very inadequate. Our activities have broadened and deepened so that our work must be separated into several departments.

We believe that anyone with a real interest in living things will find something here to engage his attention.

Our thanks are due to all of those who have made possible our growth. We extend to them our appreciation and hope that they will continue to call upon us. To those who have never made use of our facilities, we extend a hearty invitation.

Visitors are welcome on week days. We are not open on Sundays.

Donald White, President
Walter W. Johnson, Treasurer

General Directions

Order in Time. Never put off an order till the last moment. Time waits for no one, and a practice of late ordering will sooner or later result in a late completion of an order.

Forwarding. Most of our goods are sent by express, purchaser paying charges. Cut flowers and floral designs are sent by mail whenever possible, purchaser paying postage. If customers desire plants or bulbs sent by parcels post, simply add ten per cent of order to payment.

Local Delivery. We give free delivery on all orders of one dollar or more in the towns of Wakefield and Stoneham, Mass., besides the Winchester and Melrose Hospitals situated nearby. A delivery charge of ten cents is charged for all orders of less than one dollar in the first-named towns.

Free delivery is provided on all orders of $5.00 or more in all places within a ten-mile radius.

Otherwise, delivery charges are made according to distance and value of order.

Errors. While we do not wish to make errors, we are but human. Therefore, kindly inform us at any time—and immediately—of any error that may occur in any order.

Cash With Order. This is absolutely necessary except in the case of those who have regular accounts with us.

Non-Warranty. Customers realize, of course, that it is to our best interests to send out material of good quality. As so many accidents happen after goods are out of our hands, it is obviously impossible for us to guarantee our products in any way, shape or manner. We, therefore, give no warranty as to description, quality or productiveness of any of the plants, bulbs or other materials we send out, and will not be in any way responsible for any results therefrom, and every order for articles named in this catalogue will be executed on these conditions only.
Department of
Landscape Design and Upkeep

Our efforts in landscape design are confined principally to residence grounds. This is one of the most interesting of all the branches of landscaping. It is the part nearest to the heart of the people and yet, strange to say, one of the last to be developed in America. The time is coming when the laying-out of the grounds will be considered in the estimates of house costs in many more cases than it is today.

It is obvious that no prices can be given here for such work, but inquiries concerning any particular piece of design will receive our careful consideration.

On the upkeep part of the landscape program, we will do the plantings contained in such designs and furnish the materials required, if such is the wish of the client. Moreover, we are prepared to do pruning of fruit trees and shrubbery.
Department of
Floral Design and Decorating

Wedding Designs.
Prices on these are impossible to give as they vary from time to time and as so much depends upon the types of bouquets desired. We invite inquiries concerning them.

Funeral Designs.
Wreaths, sprays, pillows and other special designs. Prices upon request.

Presentation Bouquets.
Table Bouquets.
Floral decorating for weddings, receptions, parties and other functions. Estimates will be gladly submitted for any particular place and event.
Department of
Cut Flowers

Without doubt this is our largest item. Most of our cut flowers are sold wholesale on the New York and Boston markets. Our retail trade, however, is taking more and more of this product. Our principal cut flower, as our name signifies, is the Carnation. Of these we have seventeen varieties. We have sent these by mail as far as Bay City, Michigan, and Chicago, with satisfactory results. We grow various other greenhouse flowers, such as Calendulas (orange and yellow), yellow and white Marguerites, blue Daisies (Agatha), Bouvardia, Swainsona, Erlangea, Sweet Peas, Snapdragon, Stevia, Lupins, Chrysanthemums and Baby's Breath.

We make a specialty of forcing bulbs. Freesias constitute our principal bulb crop. We have these in various colors, white, pink, yellow and lavender. Then we have Tulips, Hyacinths, Ixias, Tritonias, Montbretias, and Narcissi of various kinds, besides Iris filifolia Imperator, and various Gladioli.

Thus it will be seen that our winter supply of cut flowers consists of a large and varied assortment. In spring and summer, many kinds of outdoor flowers are in bloom. At all times we are prepared to handle cut flower orders.

Our proximity to reputable growers of various specialty crops makes it possible for us to procure practically any kind of cut flowers for which our patrons may call.
A comparison with our list of last year will show one less variety. Several new kinds appear while others have dropped out. Our stock on many kinds is limited. We have some of the best kinds represented and are growing others that will appear in our later lists. Certain descriptions are taken from the Cornell Extension Bulletin No. 11, “Varieties of the Garden Gladiolus” by Alfred C. Hottes. Where figures such as (153 IV) are given after a color, it refers to the Plate and Shade of the Répertoire de Couleurs, which is accepted by the Color Chart Committee of the American Gladiolus Society. In this particular case the reference is to Plate 153, Shade IV.

Cat. No.

248 Empress of India—Large... Perianth brighter than plum-violet (172-IV), a white dash in the throat around which the color is lighter. Color almost black, and very velvety in appearance. Bloom compact and of good substance. (Hottes) ...................... 1.00 .85 .70

210—Evelyn Kirtland—Geranium pink, shading to pale pink. Lower petals blotted brilliant scarlet .................................. .80 .70 .60

212 Gaiety—Medium size... Perianth light scarlet (87-1) splashed with deeper scarlet (87-IV), the lower segments more thickly splashed. A pure white throat blotted and penciled with crimson-red (114-III). Good open bloom of striking color and excellent substance. Attractive. (Hottes) ............. 1.75 1.50 1.25

214 Glory of Kennemerland—Deep rose pink. Lower petals have a purple blotch on a creamy-yellow ground... .60 .50 .40

215 Golden Measure—Pure yellow, self-color. ........................................... 1.75 1.50 1.25

216 Gretchen Zang—Vinaceous pink shading lighter. Scarlet-red blotch on rose ground. ...................... .70 .60 .50

217 Halley—Large (11 cm.), wide... Perianth madder lake (122-III) with fine stripes and dots of Tyrian rose (155-IV) on a lemon-yellow throat. Though it is catalogued as salmon, it has considerably more of a pinkish appearance. An attractive color. Substance excellent; and bloom compact. Four or five blooms open at once. (Hottes) .......... .50 .40 .30

218 Helen Franklin—White ruffled. Purple featherings on lower petals. ....................... .50 .40 .30

219 Herada—Magenta shading to pink in throat. Rose blotch on lower petals . .80 .70 .60

220 Le Marechal Foch—Large, pale pink. Small old-rose stripe on lower petals. . .50 .40 .30

221 Maidenblush—Pink, mottled darker. Lower petals have a small crimson blotch on purplish-yellow ground .... .80 .70 .60

222 Mona Lisa—Palest soft rose-pink, or blushed white. .................................... 2.25 2.00 1.75

223 Mrs. Dr. Norton—One of the best. La France pink shading to very pale pink throat. Lower petals have creamy bases with carmine markings. ........... 1.00 .85 .70

Cat.
No. 224 Mrs. Francis King—Large. . . Perianth vermilion-red (87-II) sparsely splashed with deeper vermilion-red (87-III), and often penciled to form a blotch on two lower segments of vermilion-red. Bloom well open and the standard of substance; shape excellent; and the color clear. Six blooms open at one time. (Hottes.) .......... .60 .50 .40

225 Mrs. Frank Pendleton —Large. . . Perianth rosy pink (118-I-II) with a large ox blood red (94-II) blotch. Excellent color, good size, good substance, well arranged. Four or five blooms open at once. (Hottes.) .......... .70 .60 .50

226 Mrs. Watt—Medium size. . . Perianth crimson-red (114-III) with a lighter medial line on lower segment, and a light base of inferior, lower segment. The color is an excellent deep red. Blooms have good substance and are well arranged on a neat spike. . . . Four blooms open at once. (Hottes.) .......... .80 .70 .60

249 Myra—Rich salmon on yellow ground. .......... .80 .70 .60

227 Myrtle—Shell pink. ......................... 1.00 .85 .70

229 1910 Rose—Pure rose-pink. ................. .70 .60 .50

230 Orange Glory—Very rich orange ruffled 1.75 1.50 1.25

231 Panama—Large. . . Perianth lavendar-pink, a little more rosy tinted than mauve-rose (153-IV), the color becomes almost white in the throat. Lip marked with Tyrian rose (155-III), not quite so decided as in America. The color is slightly darker than that of America, and the substance is better. . . . (Hottes.) ......................... .60 .50 .40

250 Pearl, The—Clear, soft pink turning to light cream in center. .......... .60 .50 .40

233 Pride of Goshen—Large . . Perianth light reddish salmon (73-I) blotched with ox-blood red (94-II). Compact bloom of excellent substance. (Hottes.) 1.25 1.00 .75

234 Prince of Wales—Strawberry pink shading to a very pale pink throat. Faint scarlet blotch on lower petals. .70 .60 .50

226 Purity—White. ......................... 1.00 .85 .70

239 Rosy Glow—Rose-pink on white ground. 1.75 1.50 1.25

240 Rouge Torch—Medium size. . . Perianth amber-white (12-I) thickly suffused with salmon-carmine (125-I) blotched with deep carmine-red (114-IV). A compact bloom of good color and substance, well arranged on spike. Four blooms open at one time. (Hottes.) ......................... .80 .70 .60

### Iris

Our Iris list is much larger than that of a year ago, many fine varieties having been added. Still more good things are on the way and will appear in our lists from time to time. We make a separate list rather than include the Iris in our perennials, as we make a specialty of them and because there are so many varieties. Descriptions marked “Sand” in parentheses are taken from the Cornell Extension Bulletin 112, by Austin W. W. Sand.

Several terms used in certain descriptions are here defined (from Cornell Extension Bulletin 112).

- Self—standards and falls of apparently the same color, and unmarked.
- Plicata—standards marked. The ground color variable, the markings also variable, sometimes bronze, but never yellow.
- Veined bicolor—venation present in blade of falls. Ground of any color, venation red or purple toned, sometimes bronze, but never yellow.
- Velvety bicolor—usually, but not always, due to veins becoming confluent on the fall.
- Solid bicolor—colors often blended, but rarely dominantly yellow.

Unless otherwise noted, the dozen price is ten times that of an individual.

### Alcazar—Color effect light hortense violet, velvety pansy-violet bicolor. A large, well-balanced flower of extra substance, firm texture, and good fragrance. This is a distinct variety, a late bloomer, and one of the best ten as a specimen plant. (Sand.)

50 cents each.
Ambassadeur—Color effect a smoky bronze, dark velvety maroon bicolor blend. . . . An exceptionally tall, widely branched, and late bloomer. It is unexcelled in its class for size of bloom. (Sand.) $1.00 each.

Archeveque—Standard deep purple-violet. Falls rich deep velvety violet. This in an unusual and rich color effect but seldom found in Irises. 50 cents each.

Cecile Minturn—A uniform soft shade of cattleya-rose. A free bloomer. Best and largest pink-toned variety available for mass effect. $1.00 each.

Charles Dickens—Medium height. Standards blue. Falls dark blue, suffused and veined dark violet. 25 cents each.

Chester J. Hunt—Standards celestial blue. Falls dark marine blue, bordered pale blue. A beautiful Iris. 50 cents each.

Col. Candelot—Color effect a smoky copper, velvety red-brown bicolor. . . . It is exceptional for its intense color mass furnished by numerous medium-sized blooms. (Sand.) 65 cents each.

Crusader—Standards light blue. Falls deep violet-blue. Very large flowers. One of the best and clearest blues. 75 cents each.

Dalila—Standards pale flesh white. Falls rich red purple with yellow beard. $1.00 each.

Dalmarius—Color effect a slightly blended lavender self. . . . The dense orange beard is conspicuous, lighting up the rather sombre tone of the flower. This variety is very free-flowering, and maintains its effective color mass over a long period. The subdued, delicate lavender and gold coloring, delicate fragrance, and profusion of blooms make it excellent for cut flower, for mass, or for specimen clump. (Sand.) 25 cents each.

Dejah—A Perry seedling. Magnificent tall-growing variety. 4 1-2 feet or more. Standards dark silver-blue. Falls bright mauve blue. Bold yellow and white beard. $2.50 each.

Etta—Color effect a deep cream self. . . . The plant is a vigorous grower, producing many large flowers, which are deeper in color than King Christian, also of the intermediate group. This variety is excellent for mass plantings of medium height. (Sand.) 25 cents each.
Fairy—Color effect an opalescent blue—white self. The rate of increase of this variety is slow. Its delicious scent and delicate tints contrasting with its brilliant beard and crests, place it among the distinct varieties. It is an excellent cut flower. (Sand.) 35 cents each.

Flavescens—Color effect a light yellow self. The blooms are fair-sized, sweet-scented, and admirable for early cut flowers. Being one of the older sorts and floriferous, this variety is still recommended for mass planting. (Sand.) 25 cents each. $2.00 per dozen.

Florentina Alba—Color effect an iridescent, creamy white self. Its spreading, open flowers, of opalescent cream and gray-blue tints, are excellent in the landscape mass, or as cut flowers. It is sweet-scented and early-flowering. This sort is one of the best ten and rated too low at 75. (Sand.) 25 cents each.

Fritjof—Color effect a pale violet, velvety purple bicolor. Its freedom of bloom gives excellent color mass, effective for a long period. This variety is a very desirable intermediate. (Sand.) 25 cents each.

Georgia—Large flowers of a uniform soft shade of cattleya-rose. One of the best pinks. $1.00 each.

Her Majesty—Color effect a mallow pink, light mallow purple self, slightly blended and veined. The good-sized, fragrant blooms are borne on rather heavy, stiff stems. Its color is pleasing, and the firm texture of the blooms makes it a good cut flower. As a distinct pink and a late mid-season bloomer, it is still worthy of a place in any garden. (Sand.) 25 cents each.

Honorabile—Color effect, a yellow, red-brown bicolor. The plant is a vigorous grower, producing many small to fair-sized flowers. The newer variety, Fro, is much preferred today, though many still retain Honorabile for its color contrasts and its historic past. Rating is too low at 40. (Sand.) 25 cents each. $1.50 per dozen.

Inca—Of taller, stronger growth and more brilliant coloring than Pfauenauge. Standards clear, deep saffron-yellow. Falls velvety dark plum, edged gold in medial line and reticulations at the base. One of the most brilliant varieties. 50 cents each.

Ingeborg—Color effect a white self. This is an intermediate variety of vigorous habit, large flowers and persistent green foliage. (Sand.) 25 cents each.
425 **Japanese**—Color effect a light lavender, deep violet bicolor. . . . The standards are reflexed and the falls are spreading, so that the form of the expanded bloom is flat, like that of the double Japanese varieties. Its irregular markings and widespread segments are distinctive. (Sand.)

75 cents each.

427 **La Neige**—Color effect a clear white self. . . . This variety is the best white for form and substance yet produced. (Sand.)

50 cents each.

432 **Mons. Oliver Perthius**—A large flowered plant. Stems 41-2 feet or more. Standards blue, shaded mauve. Falls bright purplish violet. Beautiful.

$3.00 each.

435 **Mildred Presby**—Standards white. Falls rich dark velvety pansy-violet, with narrow edge of lavadner-white. An exceedingly splendid variety for garden use. Its bright shades fill the corner where they are with light and color.

$2.00 each.

429 **Madame Chereau**—Color effect a lavender-white plicata. . . . The flowering stalks are tall and well-branched, and carry the smallish blooms well above the compact foliage. The delicate coloring, the clear penciling, and the symmetrical form of the individual bloom have not been rivalled by the productions of the modern hybridist. This is one of the best ten, and absolutely lovely, despite its low rating of 74. (Sand.)

35 cents each.

430 **Madame Chobaut**—Standards white shot with pale chalcedony yellow, shading into wine red. Falls white edged with lilac. Very pretty and unique.

75 cents each.

431 **Magnifica**—Standards light violet-blue. Falls dark reddish violet, with brown stripes at the base. Very large, sweetly-scented blooms. A striking Iris.

$1.00 each.

454 **Loreley**—Color effect a flecked yellow, velvety pansy violet veined bicolor. . . . The flowers are borne on widely branched stalks, and the segments of the blooms expand so that the general effect is that of a short, open bloom with cup-formed standards. Under some circumstances, fall blooms appear. Their bright colors make interesting masses in the border. (Sand.)

50 cents each.

455 **Lohengrin**—Uniform soft shade of cattleya-rose. Very large. One of the best of its color.

35 cents each.

458 **Lord of June**—Color effect a light chicory-blue, lavender-violet bicolor. . . . The standards are very large, and inclined to fade and become floppy in intense sun. The tall stalk branches low and widely, bearing its large, oblong flowers well. Its fruity fragrance is an added attraction in the cut flower. (Sand.)

452 **Mons. Oliver Perthius**—A large flowered plant. Stems 41-2 feet or more. Standards blue, shaded mauve. Falls bright purplish violet. Beautiful.

$3.00 each.
Mount Penn—Standards lavender-rose. Falls crimson-lilac. Tall. 50 cents each.

Mrs. H. Darwin—Color effect a white self, veined purple. . . . Its flower stalks are of medium height, well-branched, and freely produced. The individual blooms are compact, well-rounded, and fragrant. It is an excellent white for massing or for cut flowers. Rating too low at 68. (Sand.) 25 cents each.

Pallida australis—Color effect a pale blue-violet to pale hortense-violet self. . . . The firm-textured blooms are well rounded, large-sized, and fragrant. It is . . . an excellent cut flower. Rating 64 is too low. (Sand.) 25 cents each. $2.00 per dozen.

Pallida dalmatica—A pallid violet self. . . . The large blooms are carried in compact heads well above the foliage. Many strains have been selected from this sort, all having the characteristic cool, lavender-blue color tones. . . . Its freedom of flowering and its height are its two outstanding characteristics. (Sand.) 25 cents each.

Pfauenauge—Color effect a bronzed yellow, velvety purple, blended and veined bicolor. . . . The flowering stalks are of medium height, carrying their interesting, vari-colored flowers in good form. Its fragrance is very good. . . . This variety is interesting in mass. (Sand.) 33 cents each.

Pocahontas—Very large orchid-type flower, with elegantly frilled petals. Standards white, faintly bordered pale blue. Falls pure white. 25 cents each.

Powhatan—Standards light bishop-violet, with deeper border. Falls deep purple, shaded crimson. Large horizontal spreading flower. 35 cents each.

Princess Victoria Louise—Color effect a yellow, plum-bordered cream bicolor blend. The plant is vigorous and has . . . well-branched, moderately-tall flowering stalks. Its numerous, good-sized blooms are pleasing in color combination and showy in separate mass planting. (Sand.) 25 cents each.

Pumila excelsa—Color effect a brilliant yellow self. . . . This excellent dwarf iris is free blooming and good for its bright color mass in early spring. (Sand.) 25 cents each.

Pumila hybrida cyanea—Color effect a dark violet self. . . . The individual flowers are rather large for a dwarf a plant and are freely produced, giving a dense mass. For a pumila hybrid this sort holds its color effect longer than usual. (Sand.) 25 cents each.
Quaker Lady—Color effect a smoky lavender, ageratum-blue, bronzed and blended bicolor. . . . The flowering stalks are freely produced, above medium height, well-branched, and carry their numerous blooms in a fine mass. The soft, smoky lavender, blending with old gold in the fair-sized, firm-textured flowers, is very pleasing when used in mass with bright yellows. This variety is a late bloomer. (Sand.)

35 cents each.

Queen of May—Color effect a reddish phlox purple veined self. . . . The moderately-tall, high-branched, flowering stalks are freely produced and well furnished with good-sized, sweet-scented blooms. This is an older sort, outstanding for its pink color mass. (Sand.)

25 cents each.

Rose Unique—Color effect a rose-purple veined self. . . . The stalks are erect, intermediate in height, and well furnished with bloom. The good color mass and the early blooms make this variety worthy of its place among the intermediates. (Sand.)

35 cents each.

Sambucina—Color effect a pale purplish drab and Chinese violet blended and veined bicolor. . . . The erect flowering stalks are freely produced, and are well and high-branched. The fair-sized flowers are firm in texture and heavily elder-scented. The numerous early blooms are of sombre shade and interesting in mass or as cut flowers. (Sand.)

25 cents each. $1.50 per dozen.

Seminoles—Standards dark violet rose. Falls rich velvety crimson. One of the very finest red varieties in existence. Rich in color, not dingy. Wonderful mass effects. Blooms early, with Cecile Min-turn, and is an excellent companion in massing.

75 cents each.

Sherwin Wright—Golden yellow. Vigorous. 2 feet.

25 cents each.

Sindjhat—Color effect a blended lilac-drab, neutral violet bicolor. . . . The flowering stalks erect, stout, exceptionally tall, and well-branched. The blooms are large, open, and of firm texture. (Sand.)

$1.00 each.

Souv. de Mme. Gaudichau—Color effect a violet, brilliant black-purple bicolor. . . . The growth of this variety is rampant, the stalks are tall and well-branched, and the blooms are of extra size, substance, and brilliancy. It is a striking and remarkably early sort. (Sand.)

$1.50 each.

25 cents each.

Wyomissing—Color effect a light pink veined self. . . . Its flowering stalks are freely produced, erect and well and short-branched. The delicately-colored, open blooms are of fair size, frail to firm texture, and delicate color. (Sand.)

25 cents each.
Department of Pot Plants and Bedding Plants

We carry on hand an assortment of pot and bedding plants for local trade, specializing on geraniums and vincas. We have many other kinds in small numbers and are glad at any time to obtain for our customers any plants they may desire. Prices on this class of material quoted on request.

Department of Annual Plants

We grow many annual plants for our own use and customers may rest assured that we strive to have these plants of high grade.

Our asters are the principal crop of this type. This last fall our aster display won first prize at Horticultural Hall, Boston.

Price: Thirty-five cents a dozen, except as otherwise noted. This price is for plants once transplanted into flats; sometimes we have small lots of pot-grown plants at one dollar a dozen.

**Antirrhinum** (Snapdragon) — Large-flowering, half-dwarf (about 18 inches). Choice mixed.

**Arctotis grandis** (African Daisy)—Very nice daisy-like flowers, white above and bluish beneath; the centers are steel-blue. Two to three feet high. Blooms last a week or ten days in water.

**Asters**—for all seasons. Colors separate: blue, rose pink, white, purple, shell-pink, and red. Several different types.

**Balsam**—An old favorite, producing gorgeous masses of brilliant colored double flowers in profusion. Finest mixed.

**Browallia** (Amethyst)—Elatia mixed. Blooms profusely. Blue or white flowers. Will bloom in the winter if the plants are taken up in the autumn and cut back. 18 inches.

**Centaurea imperialis** (Royal Sweet Sultans)—Fine for cut flowers. Their odor, their beauty, the length and strength of their stems, and their ability to stand up for several days in good condition, make them the popular flowers they are. Separate colors: Deep lavender, deep purple, delicate lilac.

**Centaurea suaveolens** (Yellow Sweet Sultan or Grecian Cornflower)—Lasts well. Showy, large, bright yellow blooms.

**Chrysanthemums, Annual or Painted Daisies**—Showy in the garden and excellent for cut flowers. Two feet. Flowers are single and daisy-like, quite distinct from the fall types. We grow several varieties, the colors being largely in the browns, yellows, reds and white.
Cosmos, Extra Early Colossal or Midsummer Giant—Mixed colors.

Early Double—Mixed colors.

Didiscus coeruleus (Blue Lace Flower)—Blooms from July to November. Pale lavender blossoms. Are excellent for cutting. About 18 inches.

Globe Amaranth (Gomphrena)—Fine for bedding. Flowers look like the heads of clover. They may be dried for winter use.

Larkspurs—While we recommend the perennial kinds in general, the colors of the annual have a much wider range. Separate colors: Ageratum Blue, Lustrous Carmine, Exquisite (rose-pink).

Helichrysum monstrosum (Straw Flower)—Double flowers. Very effective in the garden with their bright colors and one of the very best of the “Everlastings”. We handle the following:
- Buttercup—Rich yellow.
- Rose Carmine—Rich color.
- Salmon—A rosy-salmon.
- Silver Ball—White.

Marigolds, African—Yellow in various shades. Double mixed. Two to three feet.

Marigolds, French—Yellows and browns. Double mixed. Up to 12 inches.

Rhodanthe (Swan River Everlasting)—Flowers everlasting. Mixed colors. One foot.

Salpiglossis, Large-Flowering (Painted Tongue)—A fine annual. 24 to 30 inches high. From the middle of the summer until frost their attractive flowers are produced in a large and unusual range of colors. The cut flowers last well. Mixed colors.

Salvia splendens (Scarlet Sage)—A favorite bedding plant with many people.
- America—The earliest, the most free and the most continuous bloomer, of all the scarlet sages. 15 inches high, with scarlet flowers carrying the total height to 2 feet. ($1.00 a dozen.)
- Splendens—Bright scarlet. 3 feet. ($1.00 per dozen.)

Scabiosa (Mourning Bride)—A very beautiful annual, flowering until the hard frosts. The shades of color are delicate and exquisite. Very fine for cut flowers. Separate colors:
- Azure Fairy—A clear lavender-blue, one of the best.
- Crimson—Rich rosy crimson.
- Rose—Soft rose color.
- White—Pure white.

Schizanthus (Butterfly Flower)—Blooming throughout the summer this is one of our most charming annuals. The flowers are very dainty and light, the foliage is finely cut. We carry a mixture of the regular type; 18 inches.

Stocks (Gilliflower)—A very popular annual. Colors are brilliant, blooms are fragrant and profuse.
- Early Giant Imperial strain in separate colors: Rose-pink, Fiery Blood-red, White, Golden Bell, Lavender, Violet.
Xeranthemum (Everlasting, or Immortelle)—X. annuum. One of the best Everlastings, showy in the garden and useful for winter use. Bright rose, purple and white. 3 feet. Mixed colors.

Zinnias—Dreer's Special Strain of Giant Double. This is a fine old favorite and this strain is a fine strain. Mixed colors.

Department of Hardy Perennial Plants

Our aim, as stated last year, is to acquire one of the most unique stocks of perennials in this part of the country. We do not carry a large quantity of any kind, preferring to specialize on a wide assortment and on those kinds that are more rare. Many of our seeds are procured abroad. We are importing plants from our own Southwest, endeavoring constantly to find new and beautiful forms fitted to our climate. In alpine and rockery plants we have a special interest.

Unless otherwise noted, $2.50 per dozen.

Cat. No.
100 Achillea ptarmica (Sneezewort)—Boule de Neige. Double flowers borne in heads. Centers of the flowers are fuller than those of the Pearl, making it appear of a purer color. 2 feet. Good for a cut flower.

101 Alyssum saxatile compactum (Dwarf Goldentuft)—Fine for rock gardens, especially for drooping over rocks. Blooms in early spring.

10 Anchusa italica (Italian Bugloss)—Dropmore variety. A strong-growing, blue-flowered plant. Suitable for heavy backgrounds. Flowers during May and June. 3 to 5 feet. ($3.00 per dozen.)

102 Anemone hupehensis—Resembles, on a small scale, Anemone japonica. 18 to 24 inches. Blooms from early August until late autumn. Flowers of a pleasing mauve-rose.

103 Anthemis tinctoria (Yellow Camomile)—A sturdy, bushy plant with fine-cut foliage. The daisy-like yellow flowers are borne abundantly from June until fall. Succeeds in very poor soil.

104 Anthemis tinctoria kelwayi (Kelway Camomile)—The best one for gardens on account of its particularly long flowering season. Yellow flowers.

Aquilegia (Columbine)—One of our most graceful and beautiful garden flowers; easy to grow.

16 — long-spurred in blue shades. Every lover of flowers should have these.

17 — long-spurred in pink and scarlet shades.

105 — Mrs. Scott hybrids. A very fine strain.

18 — vulgaris (European Columbine)—Single flowers, light yellow to crimson.
106 **Arabis alpina** (Alpine Rockcress)—Blooms soon after the snow disappears. Small, white flowers with four petals. It makes a very showy mass in the rock garden or border.

**Aster amellus** (Italian aster)—

107 — **elegans**—12 to 15 inches. Large showy flowers of a rich bluish-violet in July and August. Fine for the front of the border. ($3.50 per dozen.)

108 — **King George**—A beautiful summer-flowering aster. Large masses of blooms of rich bluish-violet. Always scarce. (75 cents each.)

109 — **Lutetia major**—Large flowers. A nice light lavender-violet. August and September, 18 to 24 inches. ($3.50 per dozen.)

**Aster, hardy**—

110 — **Mauve Cushion**—The Japanese hardy aster. Makes a circular cushion-like plant 30 inches across, 9 inches high. Flowers mauve, with silvery white reflection, measuring over 1½ inches in diameter. Blooms begin to unfold in early October. ($3.50 per dozen.)

112 **Aster subcaeruleus** (India Aster)—Dense tuft of leaves. Leafless stems 12 inches high. Very large bluish-violet flowers in June and July.

113 **Astilbe**—Mixed — Many branched feathered heads of flowers during June and July. ($3.50 per dozen.)

114 **Baptisia australis** (Blue Wild-Indigo)—Strong growers, flowers on 6-inch spikes. 3 feet high. Dark blue. Blooms in June.

115 **Bellis rotundifolia caerulescens**—Delicate little single daisy. Blue flowers abundantly borne. For the rockery.

116 **Buphthalmum speciosum** (Heartleaf Ox-eye)—A showy Hungarian species, bold foliage, yellow flowers.

36 **Campanula medium** (Canterbury-Bells)—A biennial of rare beauty. Indispensable for the complete border. Various colors.

37 — **medium calycanthema** (Cup-and-Saucer Bellflower)—Shaped as its name indicates. Various colors.

117 — **grosseki** (Grossek Bellflower)—Large, bell-shaped, violet flowers in long racemes all summer. 2 feet. ($3.00 per dozen.)

— **persicifolia** (Peachleaf Bellflower)—Our varieties of this species are all from English seed and include some of the newest and best. ($3.00 per dozen.)

118 — **Everest**—Beautiful soft blue. With good cultivation reaches a height of 5 feet.

119 — **Fleur de Neige**—Flowers very double of the purest white. Not one of the giant hybrids.

120 — **Moerheimi**—Large, snow-white, semi-double. Fine for cutting.

121 — **Queen of June**—Not as tall as Everest, but more branching. Large blooms of a light China blue color.

122 — **Shirley**—Pale blue cup-and-saucer type. Vigorous and erect.

123 — **Snowdrift**—5 feet. Stems rigid and erect. Flowers very large and pure white.

124 — **The King**—The first giant variety of the coronata
type. Flowers are a large cup and saucer and of a deep rich blue, almost violet color.

<tr>
<th>No.</th>
<th>Variety</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>125</td>
<td>Pyramidalis (Chimney Bellflower)</td>
<td>A very conspicuous bellflower. 4 to 6 feet. Large silver-like porcelain-blue flowers in August.</td>
</tr>
<tr>
<td>126</td>
<td>Centaurea dealbata (Persian Centaurea)</td>
<td>Distinct bright rose-colored flowers. July to September. 11-2 feet.</td>
</tr>
<tr>
<td>127</td>
<td>Macrocephala (Globe Centaurea)</td>
<td>Perhaps the showiest of the perennial centaureas. The yellow thistles-like flowers are very large. Plant erect, somewhat spindly, stiff stems.</td>
</tr>
<tr>
<td>128</td>
<td>Cerastium tomentosum (Snow-in-Summer)</td>
<td>Low-growing, with silvery foliage. White flowers in June. Invaluable for the rockery and as an edging plant. Fine as a covering for graves or steep bank. Any soil.</td>
</tr>
<tr>
<td>129</td>
<td>Chealone lyoni (Pink Turtlehead)</td>
<td>A late summer plant, beginning to blossom about the middle of August. About 3 feet tall with rose-purple flowers. Flowers are inflated and long, tube shaped, somewhat like Snapdragon.</td>
</tr>
<tr>
<td>69</td>
<td>Chrysanthemum coccineum (Pyrethrum or Painted Lady)</td>
<td>Main crop in June, but if they are not allowed to go to seed, will bloom more through the summer and autumn. The fernlike foliage is very attractive. Our stock is ordinarily sold under the name Pyrethrum hybridum.</td>
</tr>
<tr>
<td>130</td>
<td>Chrysanthemum coreanum (Korean Chrysanthemum)</td>
<td>With us we find the location of this plant has a great deal to do with its success. A sheltered southerly exposure, somewhat shady, gave fine results. The foliage is much more attractive than that of the ordinary hardy chrysanthemums, being a bright glossy green. The flowers are single, of a light flush pink.</td>
</tr>
<tr>
<td>131</td>
<td>Hortorum (Common Chrysanthemum)</td>
<td>Japanese hybrids. ($2.00 per dozen.)</td>
</tr>
<tr>
<td>42</td>
<td></td>
<td>Mixed varieties. ($2.00 per dozen.)</td>
</tr>
<tr>
<td>132</td>
<td></td>
<td>Maximum (Pyrenee Chrysanthemum)</td>
</tr>
<tr>
<td>43</td>
<td>Coreopsis lanceolata (Lance Coreopsis)</td>
<td>A profusely flowering plant for the hardy border. Blooms continuously and is good as a cut flower. Yellow.</td>
</tr>
<tr>
<td>133</td>
<td>Lanceolata grandiflora fl. pl. (Lance Coreopsis)</td>
<td>Double flowered.</td>
</tr>
<tr>
<td>45</td>
<td>Delphinium formosum (Hardy Larkspur)</td>
<td>Dark blue with white center, in close spikes.</td>
</tr>
<tr>
<td>134</td>
<td></td>
<td>Grandiflorum chinense (Slender Larkspur) Finely divided leaves. Short stems. Gentian-blue or white (alba).</td>
</tr>
<tr>
<td>44</td>
<td></td>
<td>Hybrids—</td>
</tr>
<tr>
<td>44</td>
<td>Belladonna—Turquoise blue. This plant needs no introduction. An old favorite. Do not allow it to go to seed and you will have flowers until frost.</td>
<td></td>
</tr>
<tr>

<td></td>
<td>Strains such as Wetterlow's and Vanderbilt.</td>
</tr>
<tr>
<td>135</td>
<td></td>
<td>Hybridum—</td>
</tr>
<tr>
<td>46</td>
<td>Dianthus caesius (Cheddar Pink)</td>
<td>Pretty bright pink flowers, a lovely plant for the rock garden, dry banks and similar situations.</td>
</tr>
</tbody>
</table>
— dentosus—Probably not a distinct specie, though so-
rated by Thompson and Morgan of England. A beau-
tiful old kind; large dark purple flowers.

— plumarius mixed (Grass Pink, also called Garden
Pink)—Very fragrant, with fringed or jagged petals.
Colors vary from white to bright scarlet, and are very
dainty.

— horticultural varieties—

— Allwoodii—A new hybrid race, Perpetual Flowering
Carnations X Hardy Garden Pinks. The form,
perfume and beauty of the old-world Garden Pink
blended with the perpetual flowering qualities of
the modern greenhouse Carnation.

— Allwoodii alpinus—"A new break in the Allwoodii
section. It is a short, compact-growing plant
(about 7 inches) and has been specially developed
for growing in walls, rockeries, crazy paths, etc.
At present colors are restricted to whites, pinks
and rose pinks."

— Hardy Perpetual Border—"A hybrid race—Borders
X Perpetual Flowering Carnations, possessed of
the form, beauty and hardness of the Border Carnation, with the freedom of flowering of the
Perpetual Flowering Carnation."

— latifolius, double mixed. (Double Cluster Pink)—
Good for summer bedding work. A continuous
bloomer.

— latifolius atrooccineus (Everblooming Sweet Wil-
liam)—Intense crimson double flowers. 18 inches.
Continuously blooming in summer.

Digitalis purpurea (Common Foxglove)—

—Ivery's Spotted—A beautiful biennial especially
suited for the old-fashioned garden.

— The Shirley—This is a strain of the Gloxinia-flowered
type, and is a magnificent race. ($3.00 per dozen.)

Echinacea pupurea (Giant Purple Cone-Flower)—
Flowers about 4 inches across; peculiar reddish-purple
with a large brown cone. July to October. 3 feet.

Eryngium planum (Sea Holly)—Steel blue. 2 feet. Use-
ful for cut flowers or to dry for winter. ($3.50 per
dozen.)

Eupatorium aromaticum melissoides (Melissa Thorough-
wort)—Sometimes called E. fraseri. White, fine for cut
bloom.

— coelestinum (mist-flower)—Myriads of small, fluffy,
azure-blue flowers. Blooms in August and September.
2 feet.

— urticaefolium (Snow-Thoroughwort) — Sometimes:
called E. ageratoides. Pure white flowers. 4 to 5
feet tall.

Gaillardia aristata (Common Perennial Gaillardia or
Blanket Flower)—Sometimes called G. grandiflora (and
so-called in our price list of last year). A well-known
showy plant.

— aristata, var.—Copper Red.

— aristata, var.—Golden Gleam. (35 cents each.)

Geum chiloense (Chiloe Avens)—

— var. atrosangineum fl. pl.—Brilliant scarlet double
flowers. May to October. 15 to 18 inches. ($3.00 per
dozen.)
—var. Mrs. W. J. Bradshaw—Very large flowers, 1 1/2 to 3 inches across. Petals bright crimson. Both varieties good for borders and rockeries. ($3.00 per dozen.)

Gypsophila paniculata (Baby's breath)—Forming a film of white, it should be planted amongst other flowers. A nice cut flower to lighten up all sorts of floral arrangements. Large plants. ($3.00 per dozen.)

— paniculata fl. pl.—Double. These are all grafted plants and are very fine. ($6.00 per dozen.)

Helianthemum horticultural var. mutabile (Rock or Sun Rose)—Low-growing evergreens. Form broad clumps. Flower July to September and are hidden by their blooms. Rockeries, borders, dry sunny banks. This variety is a single golden yellow. ($3.50 per dozen.)

Heliopsis hort. var. Pitcher Heliopsis—2 to 3 feet. Single flowers of a very thick texture and a deep golden yellow color. Blooming in June, it keeps on through September. Good for cutting. Open, sunny situations. ($3.00 per dozen.)

— hort. var. Zinnia Heliopsis—Flowers large deep yellow and very showy, free and continuous bloomer. ($3.00 per dozen.)

Hemerocallis (Day Lily)—Along woodland paths, streams and moist banks the day lilies find a suitable home. They are good for the border and among shrubbery. We carry the following kinds:

— aurantiaca (Orange Day Lily)—Very large deep orange flowers, shaded brown. July, 2 feet.

— citrina (Citron Day Lily)—Pale lemon-yellow flowers and a tall grower.

— flava (Hort. var. major—Lemon Day Lily)—Sweet-scented, clear yellow flowers. June.

— fulva (Tawny Day Lily)—Coppery orange, shaded crimson. 3 feet. July.

— luteola (Golden Day Lily)—Cross between H. aurantiaca major and H. Thunbergi. Orange-yellow large flowers. 2 1/2 feet. July.

— Thunbergi (Japanese Day Lily)—Much like H. flavo major but comes a month later. 3 feet.

— hort. var.

— Dr. Regel—Dark yellow flowers in June and July. 2 feet.

Hesperis nivea—"A very rare Dame's Violet known to botanists for some time but which has just recently been introduced to cultivation. . . . pure white flowers . . . during May and June. . . . The racemes, when fully expanded, are about 1 foot long . . . . The flowers are very sweet-scented. . . . it is a handsome new perennial for the herbaceous border; height 2 feet." ($3.50 per dozen.)

Heuchera sanguinea (Coral bells)—We carry the horticultural variety Splendens. Leaves evergreen and geranium-like. Plants low, spikes of flowers rising 1 1/2 to 2 feet. Fine for the rockery, the foliage covering the rocks.

Hollyhocks—Double mixed. These splendid perennials need no introduction.

Hollyhocks—Single mixed.
Liatris pycnostachya (Cat tail Gayfeather or Blazing Star)—Large spikes of light rosy-purple flowers in July and August. 5 feet.

Lupinus polyphyllus (Washington Lupine)—Produces large spikes in May and June. Preferably in a semi-shady place. 3 feet. We carry the following horticultural varieties, all at $3.00 per dozen—

— *albus*—White
— *atro-coeruleus*—Blue.

Lychnis chalcedonica (Maltese Cross)—Heads of brilliant orange-scarlet in June and July. 2 to 3 feet. Any soil.

— *hort. var. chalcedonica alba* (White Maltese Cross).

Lysimachia nummularia (Moneywort)—Makes a dense carpet under trees or shrubs where grass will not grow.

Lythrum—*hort. var. roseum superbum* (Rose Loose-strife)—3 to 4 feet. Large spikes of rose-colored flowers. July to September.

Monada—*hort. hybrids.* (Beebalm)—Our stock of these consists of various shades of lavender. Showy, growing 4 feet high. Any soil. July and August.

Oenothera fruticosa—*hort. var. youngi.* (Young's Sun-drops)—Masses of fine yellow. Continuously blooming. Likes moisture. Easily grown. 11-2 feet.

Oenothera glauca fraseri (Evening Primrose)—Yellow flowers. Good border plant. Good for exposed places in the rockery. 1 to 2 feet.

Pachysandra terminalis (Japanese Pachysandra)—Trailing. 6 to 8 inches high. A fine ground cover either in shade or sun. Glossy foliage. May be used in window boxes. $2.00 per dozen.

Papaver orientale (Oriental Poppy)—

— *Edna Perry*—*hort. var.*—Large flowers of a soft salmon pink color. $4.00 per dozen.
— *Royal Scarlet*—*hort. var.*—Large flowers of brilliant scarlet, with black blotches. $4.00 per dozen.

Pentstemon torreyi (Beard Tongue)—Foliage light green. Stems wiry and thin. Brilliant scarlet flower spikes. 3 to 4 feet.

Peonies. We sell standard divisions only—

— *Adolphe Rousseau*—Rating 85. Early mid-season. Very tall and strong. Rather loose, sometimes semi-double flowers of deep garnet color. Excellent. $1.50 each. $12.00 per dozen.
— *Duchesse de Nemours*—Rating 81. Early mid-season. Blossoms cup-shaped, wide guard petals white. Narrower middle petals sulphur yellow with often a marking of green. 75 cents each. $7.50 per dozen.
— *Edulis superba*—Rating 76. Very early. Deep rose-pink with occasional crimson marking. 75 cents each. $7.50 per dozen.
— *Felix Crousse*—Rating 84. Mid-season to late. Compact bloom of large size and good form. Deep ruby red, center somewhat deeper. Choice. $1.00 each. $10.00 per dozen.
— Festiva maxima—Rating 93. Mid-season. Very large ivory-white. Appearance rather feathery with a crimson fleck in the center. 75 cents each. $7.50 per dozen.

— Marguerite Gerard—Rating 84. Late. Globular blooms of flesh-pink fading to creamy white showing a ring of gold when fully developed. Strong grower and free bloomer. $1.25 each. $12.50 per dozen.

— Mme. de Verneville—Rating 79. Early to mid-season. White. Center flesh-pink when first opened. Center petals sometimes tipped with carmine. 75 cents each. $7.50 per dozen.

— Venus—Rating 83. Mid-season. Pointed buds, opening into large, compact flowers of shell-pink with a flesh-white collar. A very fine peony. $2.00 each. $20.00 per dozen.

Phlox—The following are horticultural varieties of P. paniculata and P. paniculata X P. maculata. They are ordinarily called P. decussata.

— Africa—Ruby-crimson with darker center. $4.50 per dozen.

— Albion—Pure white, with a faint red eye. $2.50.

— Baron von Dedem—Salmon red. $2.50.

— Beacon—Brilliant cherry-red. $2.50.

— Bridesmaid—White, crimson center. $2.50.

— Clara Benz—Brilliant rosy carmine, with white eye and violet halo; medium tall. $4.50.

— Commander—New. Crimson-red with darker eye. A very striking bloom. $2.50.

— Coquelicot. Orange scarlet. $3.50.

— Debs—A fine red phlox. Bright fiery crimson. $8.00.

— Elizabeth Campbell—One of the best. Bright salmon-pink, with lighter shadings and dark red eye. $2.50.

— Evelyn—Rich salmon-rose; flowers large and of perfect form. 3 feet. $4.50.

— Fuerbrand—New. Bright vermilion-scarlet. $3.50.

— Graf Zeppelin—White with red eye. $4.50.

— Johnson's Favorite—Light salmon-pink with dark red eye. Strong grower. $5.00.

— LeMahdi—Deep velvety purple. $2.50.

— Mme. Paul Dutrie—Soft pink suffused with white. $2.50.

— Mrs. Jenkins (Independence)—White. Free bloomer. $2.50.

— Mrs. Scholten—New. Dark salmon-pink flowers in large spikes. $3.50.

— Nana coerulea—Lavender blue. $2.50.

— Rijndroom (Rynstrom)—Lovely rose-pink. Large clusters of flowers. $2.50.

— W. C. Egan—Very large flowers of delicate lilac. $2.50.

Phlox glaberrima suffruticosa—Early-flowering type with large flower heads.

— Miss Lingard—Hort. var.—One of the very best. Excellent white flowers in June and also in the autumn. Foliage of an excellent habit. $2.50.

Phlox amoena—Very good as a ground coverer, or as a rockery or border plant. 4 inches. A mass of bright pink in spring.

Phlox subulata (Moss phlox)—Foliage evergreen. Another early flowering dwarf pink phlox.
Physostegia virginiana (False Dragonhead)—Beautiful mid-summer perennial. Forms dense bushes 4 to 6 feet high. Spikes of delicate tubular flowers, bright soft pink.

Hort. var.—White False Dragonhead. Fine variety.

Platycodon grandiflorum (Balloon flower)—Closely related to Campanula. Attractive blue flowers. July to October.

Polemonium coeruleum (Jacob’s Ladder)—May to July. Light blue spikes of showy flowers. Good as a border plant, doing its best in a partially shaded location.

Potentilla—Double hybrids, mixed. Charming plants for the border. June to August. Any soil. 11-2 feet. $3.50 per dozen.

Primula polyantha—Invincible Giant mixed—An excellent spring flower. For borders, wild gardens and rockeries. Open, half-shady location. Rich soil. $3.00 per dozen.

Polemonium longiflorum fl. (Double Creeping Buttercup)—Masses of yellow flowers in May and June.

Rudbeckia purpurea—See Echinacea purpurea.

Rudbeckia speciosa (newmanni)—Showy Cone flower—Dark orange-yellow, with deep purple cone. July to September. 3 feet.

Salvia azurea—A large number of pretty sky-blue flowers in August and September. 3 to 4 feet.

Saxifraga crassifolia (Leather Saxifrage)—A very effective early spring flower. They will grow almost anywhere. Low-growing, attractive foliage with flower clusters of rosy-pink flowers about one foot from the ground. $3.50 per dozen.

Scabiosa caucasica (Blue Bonnet)—A choice summer flower of soft lavender-blue on stems 11-2 to 2 feet high. Excellent as cut flowers. June to September. $3.00 per dozen.

Sedum (Stone-crop)—Dwarf varieties. Splendid plants for the rockery, wall gardens, and carpet-bedding in general. They are also an effective plant for edging perennial borders. All varieties, $2.50 per dozen.

Sedum (Gold moss)—Very low-growing, with small bright yellow flowers.

Sedum album (White Stone-crop)—Very fine variety.

Sedum sexangulare—General appearance much like that of S. acre.

Sedum sieboldi—Round succulent glaucous leaves. Bright pink flowers in August and September.

Sedum stoloniferum—Very good. Flowers purplish-pink in July and August. 6 inches.

Sedum hort. var. coccineum (Scarlet Running Sedum)—A splendid rosy-crimson flowered form. July and August. 6 inches.

Sedum—Erect varieties. $2.50 per dozen.

Sedum spectabile (Showy Stone-crop)—Very pretty. Broad light green leaves and large heads of showy rose flowers. Late fall. 18 inches.
— hort. var. "Brilliant"—A bright amaranth-red.

Sempervivum (Houseleek) — Evergreen, succulent plants of rosette character. Good for the rockery, or any exposed or well-drained location. In mid-summer, flowers appear in clusters on a short, thick stem about 6 inches above the leaves. All varieties $2.00 per dozen.

— doellianum—Small, hairy rosettes of pale green leaves, tinted red at the tips. Bright red flowers in June and July.

— glaucum (Fuzzy .houseleek)—Grey-green leaves, lightly tipped brown. Flowers red in June and July.

— globiferum (Globe houseleek)—Grey-green leaves, lightly tipped brown. Pale yellow flowers in clusters. 1 foot high. June.

— hirtum (cornutum) (Italian houseleek)—Grey-green leaves. Flowers pale yellow.

— triste—Green leaves with markings of bright red-brown. Red flowers.

Sidalcea hybrida (Mallow-wort)—Pretty mallow-like flowers.

Statice latifolia (really Limonium latifolium) (Sea-lavender)—Fine plants for the border or rockery with broad leaves in large basal tufts. Flowers borne on wiry stems. Purplish-blue, small blooms on a very large panicle. 18 inches high. July and August.

Statice pseudoarmeria (False Thrift)—Rose and white. Fine border plant. 2 feet.

Stokesia laevis (cyanea) (Cornflower aster)—Early June to September. Flowers measure 4 to 5 inches across and are a bright lavender-blue. Any open sunny position.

Sweet William (Dianthus barbatus)—hort. var. Newport Pink—The best color of this group. A lovely salmon or watermelon pink. $2.00 per dozen.

Thalictrum minus hort. var. adiantifolium (Maidenhair Meadowrue)—Foliage like the Maidenhair Fern. Small white flowers in June.

Tritoma Pfitzeri (really Kniphofia hort. var.) (Red Hot Poker)—Any ordinary garden soil, but responds well to good treatment. Should be given protection, or else stored over in sand in a cool cellar. August to October. Spikes a rich orange-scarlet, 3 to 4 feet above the ground. $3.00 per dozen.

Tritoma quartiniana (really Kniphofia foliosa) (Sword Torch lily)—Strong growing and thick stalked. Blooms late in May with spikes 10 to 12 inches long. Orange-red at first, but yellow on bottom half as bloom matures. Hardier than the above variety. $3.00 per dozen.

Veronica longifolia subsessilis (Japanese Speedwell)—A showy variety and the best. Long dense spikes of deep blue flowers mid July to early September. 2 to 3 feet.

— spicata—Excellent plant for borders. Long spikes of bright blue flowers in June and July. 11-2 feet.

— spuria. Blue flowers in long racemes. A dwarf tufted habit. 1 foot.

Yucca filamentosa (Common Yucca) — Very effective for plantings. Foliage sword-like. Spikes of large, fragrant, drooping, creamy-white flowers, 5 to 6 feet high in June and July.
Department of Shrubs and Trees

We do not carry many shrubs and trees in stock. However, we are ready, at any time, to procure any specimens of the same for our customers. It makes it easier for them to procure the bulk of their horticultural supplies from one source and it concentrates the responsibility for the same.

Last year we acquired a small nursery and offer the following groups in order to clear out the stock. No group may be split except by special arrangement.

There are a few lots of herbaceous perennials.

Lot.
No.

1. 24 Achillaea ........................................ $ 3.00
2. 80 Arborvitae 1½ to 4 feet. About 50 of these are 1½ to 2 feet ...................................... 75.00
